

ALL YOU EVER NEED TO KNOW ABOUT CABLOFIL

Stainless steel wire tray containment specialist, Cablofil, has launched a comprehensive new catalogue, providing contractors and consultants with an indispensable guide for specifying the Cablofil system.

The 115-page catalogue is divided into seven colour-coded sections: 'the range', 'couplers', 'wall mounting', 'ceiling mounting', 'other mountings', 'installation' and 'nuts and bolts'. Each gives a full visual summary of all the products that make up the Cablofil system, along with a quick reference guide to essential information such as load bearing capacities and bend radii. The catalogue also includes important guidance on the correct methodology for cutting, shaping, joining and fixing the system.

Designed for use both by those with prior experience of Cablofil and those new to the system, the catalogue provides an introduction to the Cablofil system's unique features such as the safety edge and 'Faslock' easy connecting system. It also provides a breakdown of the accreditations and standards to which the system adheres. As the catalogue will be used across all Cablofil's international markets, the guide has been designed to be highly visual with section headings in eight languages and a complete listing of all 80 market-specific Cablofil websites.

Comments Paul Courson, managing director of Cablofil UK: "This is our biggest catalogue ever and contains everything that contractors and specifiers need to know about the system. It will be an indispensable resource for everyone who uses Cablofil."

The Catalogue is available to download from www.cablofil.com or from the Cablofil customer service team on tel: 0845 1304 628.
